DETAILED ACTION

Allowable Subject Matter

1. Claims 1-20 and 22-32 allowed.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(d) the invention was first patented or caused to be patented, or was the subject of an inventor's certificate, by the applicant or his legal representatives or assigns in a foreign country prior to the date of the application for patent in this country on an application for patent or inventor's certificate filed more than twelve months before the filing of the application in the United States.

3. Claim 21 rejected under 35 U.S.C. 102(e) as being anticipated by Lee et al. (6,853,406).

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C.

102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention “by another,” or by an appropriate showing under 37 CFR 1.131.

Lee et al. disclose an in-planet switching LCD device where in Figs. 9 and Claims 1 and 3, it is disclose a plurality of thin film transistors each including a gate electrode, source electrode and a drain electrode, a gate line electrically connected with the gate electrode, a data line electrically connected with the source electrode, a common line on the substrate parallel with the gate line, a plurality of pixel electrodes electrically connecting with the drain electrode and a plurality of common electrodes integrally connected to the common line where the plurality of common electrodes and plurality of pixel electrodes are spaced apart from each other

and arranged in an alternating manner where the width of the overlapping portion of the gate electrode and the drain electrode varies in accordance with the position of the respective one of the thin film transistors along the gate line.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
